## SUMMARY

---

Computer Science Engineering undergraduate with strong problem-solving skills and proficiency in C, C++, and Java. Experienced in developing web-based applications and working with modern technologies. Eager to contribute to real-world projects and continuously enhance technical and development skills.

## EDUCATION

---

|             |                                                                     |                                                                           |
|-------------|---------------------------------------------------------------------|---------------------------------------------------------------------------|
| 2024 - 2028 | B.Tech in Computer Science Engineering, <b>Galgotias University</b> | (GPA: 6.9/10)<br>4 <sup>th</sup> Semester, 2 <sup>nd</sup> Year (Ongoing) |
| 2021 - 2023 | Intermediate (PCM), <b>Modern Science College</b> , UP Board        | 72%                                                                       |
| 2019 - 2021 | High School (Science) , <b>Modern Science College</b> , UP Board    | 92.33%                                                                    |

## TECHNICAL SKILLS

---

- **Languages:** Java, C, C++, SQL
- **Tools / Platforms:** Git, GitHub, VS Code, IntelliJ IDEA
- **Web Technologies:** HTML, CSS
- **Databases:** MySQL
- **Core Concepts:** Data Structures, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks,
- **Soft Skills:** Problem Solving, Teamwork, Communication

## PROJECTS

---

### Student Grade Tracker

[GitHub](#)

Developed a system to manage and track student grades using Java. Implemented features like adding, updating, and calculating student performance. Applied Object-Oriented Programming concepts for structured design.

### Hotel Reservation System

[GitHub](#)

Built a reservation system to manage hotel bookings and customer records. Implemented room allocation, booking management, and cancellation features. Used file handling and data structures for efficient data storage.

### Stock Trading Platform

[GitHub](#)

Developed a platform to simulate stock trading operations. Implemented features like buying, selling, and tracking stock performance. Focused on logic building and real-time data handling concepts.

## CERTIFICATIONS

---

- **Java collection** – [View](#)
- **Java for Beginners** – [View](#)
- **C Programming** – [View](#)
- **CodeAlpha Virtual Internship Java Programming** – [View](#)

- **Computational Thinking** – [View](#)
- **DSA Using C** – [View](#)
- **Mastering MYSQL** – [View](#)
- **Java OOPS** – [View](#)
